

Prepared by the U.S. Army Topographic Command (KCLD), Washington, D.C. Compiled in 1959 by photogrammetric methods and from United States quadrangles 1:24,000, 1:25,000, 1:48,000, 1:50,000, and 1:62,500, 1927-57. Planimetry revised in part from aerial photographs taken 1944-54. Map field checked 1959. Revised by the U.S. Geological Survey 1969.

Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Control Diagram

1. Read letters identifying 360,000 meter square in which the point lies

2. Locate from VERTICAL grid line to LEFT of point and read LARGE figure labeling the line either in the top or bottom margin, or on the line itself

3. Estimate tenths from grid line to point: Look for the 100,000 figure below point and read LARGE figure labeling the line either in the top or bottom margin, or on the line itself

4. Estimate tenths from grid line to point: Look for the 100,000 figure below point and read LARGE figure labeling the line either in the top or bottom margin, or on the line itself
