Compiled from 1:100 000-scale topographic maps dated 1981 and 1985
Planimetry revised from aerial photography taken 1984-86 and other sources
May edited 1986
Bathymetry compiled by the National Ocean Service from tide-coordinated hydrographic surveys. This information is not intended for navigational purposes. Mean lower low water (dotted) line and mean high water (solid) line compiled by NOS from tide-coordinated aerial photographs
Offshore protection survey data, shown in red, furnished by the Minerals Management Service. Heavy lines indicate limits of Outer Continental Shelf Official Protection Diagram dated February 3, 1977. The protection on this map are not for Federal leasing purposes; for such purposes, refer to OCS Official Protection Diagram available from the Minerals Management Service
Projection and 10 000-meter grid zone 17; Universal Transverse Mercator 100 000-foot grid ticks based on Florida coordinate system, east and west zones, 1927 North American Datum. To place on the predicted North American Datum 1983, move the projection lines 36 meters south and 20 meters west
Location of geodetic control established by government agencies is shown on corresponding 1:250 000-scale Geodetic Control Diagram
