

Prepared under the direction of the President, Mississippi River Commission.
Horizontal control by the U. S. Coast and Geodetic Survey.
Vertical control by the U. S. Coast and Geodetic Survey.
Descriptions, elevations and geodetic positions of bench marks may be obtained from New Orleans District, New Orleans, La.
Planimetry revised from aerial photographs flown by U. S. Air Force, November 5 and 24, 1945, and supplemented by information obtained from Federal and State agencies and private corporations.
U. S. Geological Survey quadrangle maps, scale 1:31,690, used as base, with necessary corrections and additions made for adoption to flood control use.
Political boundaries are shown according to best available information and are subject to change except where established by court decision.
Depths in Gulf of Mexico and coastal waters are below mean low water and were taken from U. S. Coast and Geodetic Survey Chart No. 1273, dated May 16, 1948. The shoreline indicated is mean high tide. The outer limit of the foreshore area is waters edge and not mean low water. The shoreline and foreshore area were taken from aerial photographs.
Dashed land lines are projected from best available data.
Polyconic Projection, 1927 North American Datum.
