

Control by USGS and USC&GS

Polyconic projection. 1927 North American datum
10,000-foot grids based on Missouri coordinate system, central zone
and Iowa coordinate system, south zone.

A diagram of a ship's heading indicator. A vertical line represents the ship's axis, with a star at the top. Two lines diverge from the axis, labeled GN (true north) and MN (magnetic north). The angle between them is 7°. A horizontal line is labeled 7° and 124 MILS. Below this, the angle 0°22' is shown, with 7 MILS written below it.

UTM GRID AND 1964 MAGNETIC NORTH
DECLINATION AT CENTER OF SHEET
