TO ONE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 1000 METERS

1. Read letters identifying 100,000 meter square in which the point lies.

2. Locate first HORIZONTAL grid line to LEFT of point and read LARGE figure labeling the line either on the top or bottom margin or on the line itself. Estimate distance from grid line to point.

3. Locate first VERTICAL grid line below point and read LARGE figure labeling the line either on the left or right margin or on the line itself. Estimate distance from grid line to point.
