

Prepared by the U.S. Army Topographic Command (CGSX), Washington, D.C. Compiled in 1956 by photogrammetric methods and from United States quadrangles, 1:50,000, 1952. Planimetry revised from aerial photographs taken 1952. Photographs field annotated 1954. Revised by the U.S. Geological Survey, 1970.

Transverse Mercator Projection, 10,000-meter Universal Transverse Mercator grid, zone 11. 100,000-foot grid ticks based on Nevada coordinate system, central and west zones and the California coordinate system, zone IV, 1927 North American Datum. To place on the predicted North American Datum 1983, move the projection lines 10 meters north and 80 meters east.

Location of geoidetic control established by government agencies is shown on corresponding 1:250,000-scale Geoidetic Control Diagram.

There may be private inholdings within the boundaries of the National or State reservations shown on this map.

LEGEND
 Figures in red denote approximate distances in miles between stars.

POPULATED PLACES
 Over 500,000
 100,000 to 500,000
 25,000 to 100,000
 5,000 to 25,000
 1,000 to 5,000
 Less than 1,000

ROADS
 Primary, all-weather, hard surface
 Secondary, all-weather, hard surface
 Light-duty, all-weather, hard or improved surface
 Fair or dry weather, unimproved surface
 Trail
 Interchange

RAILROADS
 Single track (double or multiple)
 Standard gauge
 Narrow gauge
 BOUNDARIES
 International
 State
 County
 Park or reservation

LANDMARKS: School; Church; Other
 Mine
 Spot elevation in feet
 Marsh or swamp
 Intermittent or dry stream
 Power line

LANDING AIRPORT
 Landing area
 Seaplane airport
 Seaplane anchorage

Woods; brushwood

Scale 1:250,000
 0 5 10 15 20 25 30 Statute Miles
 0 5 10 15 20 Kilometers
 0 5 10 15 Nautical Miles

CONTOUR INTERVAL 200 FEET WITH SUPPLEMENTARY CONTOURS AT 100 FOOT INTERVALS

1970 MAGNETIC DECLINATION FROM TRUE NORTH IS 16' (280 MILS) EASTERLY OVER THE ENTIRE AREA

FOR SALE BY U.S. GEOLOGICAL SURVEY, DENVER, COLORADO 80225 OR RESTON, VIRGINIA 22092

GRID ZONE IDENTIFICATION
 18Q UTM
 11S
 43D

TO GIVE A STANDARD REFERENCE TO THIS SHEET TO NEAREST 1000 METERS
 SAMPLE POINT: 18Q UTM 11S 43D
 1. Read letters identifying 100,000 meter square in which the point lies.
 2. Look under 18Q UTM on left side of chart and read LARGE figure labeling the point on the line above or bottom margin, or the line below.
 3. Look under 11S on top or bottom margin, or the line above or bottom margin, and read BELOW figure labeling the line above or bottom margin.
 4. Look under 43D on top or bottom margin, or the line above or bottom margin, and read RIGHT figure labeling the line above or bottom margin.
 5. Add the three numbers together to give the 1000 meter reference.
 6. If reporting beyond 50' in any direction, give Grid Zone Designation, etc.
