GRID ZONE DESIGNATION	TO GIVE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 1000 METERS
18R	SAMPLE POINT: 588 515
18R	1. Read letters identifying 100,000 meter square in which the point lies.
18R	2. Locate first VERTICAL grid line to LEFT of point and read LARGE figure labeling line near center of the top or bottom margin on the line above.
18R	3. Locate first HORIZONTAL grid line to point and read LARGE figure labeling line near center of the right margin, or on the line just below the right margin, on the line just below the right margin.
18R	4. Read the smaller figures of any grid square below and to the right of the full coordinates line ONLY the LARGE figure are of the grid number.
18R	5. Example: 4778650
18R	SAMPLE REFERENCE: 18R 588515
18R	If reporting beyond 18' in any direction, prefix Grid Zone Designation, as: 18R9E332

Prepared by the U.S. Army Topographic Command (TPK/CBM), Washington, D. C. Compiled in 1958 by photogrammetric methods and from United States quadrangles, 1:24,000, 1:25,000, and 1:31,680, 1929-52; USCGS Charts 1952-55. Planimetry revised from aerial photographs taken 1955. Photographic field annotated 1956. Revised by the U.S. Geological Survey 1969.

Selected hydrographic data compiled from USCGS Charts. This information is not intended for navigational purposes.

Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Control Diagram.

Transverse Mercator Projection, 10,000-meter Universal Transverse Mercator grid, zone 14, 100,000-foot grid ticks based on Texas coordinate system, south zone, 1927 North American Datum. To place on the predicted North American Datum 1983 move the projection lines 34 meters south and 27 meters east.
