1. Read letters identifying 100,000 meter square to which the point lies.
 2. Locate true north-south grid line to left of point and read LARGE figure labeling the line when in the top or bottom margin, or on the line itself.
 3. Locate true east-west grid line to point. Estimate tenths from grid line to point. Estimate tenths from grid line to point. Estimate tenths from grid line to point.
 4. If reporting figure in any direction, prefix Grid Zone Designation, etc.
